### A Tale of Two Patients.<sup>rev1</sup>

Two people were patients at Dallas Regional Socialist hospital in spring of 2018. We will call them Pt1 and Pt2.

Pt1 is roughly 15 years older than Pt2; different eras, different teachers. Pt1 has paid into the American socialist system much longer and still does and will until death. Socialists love him as the perfect slave who drops dead still paying these parasites for life. Pt1, over 40 years ago, wrote off the Socialist system and its medical care as a horrible warning in toto swearing that he would die before ever going back to that sh\*t hole. He set out and succeeded in the world notwithstanding many socialist related diseases caught from working

hazardous socialist govt jobs demanded of him by the system, Socialism denied all his acquired employment related diseases after employment termination over 40 years ago. Since then he learned to cope with them until they erupted decades later into a deadly emergency, which nearly killed him. By all rights they should have, proper. Unfortunately, it takes a lot of suffering and dying to kill a man. Moreover, nobody leaves here without owner permission. He obeyed the rules: paid and still pays taxes, raised and lost a family, stayed clean, sober and out of trouble, finished a career, education, honorably discharged his Military obligation, voted in nearly every election, served jury duty and other mandatory civic obligations many times, successfully raised a wife, her mother and child, took care of aging parents and less fortunate family members, friends, neighbors and much, much more. He has never been unemployed since age 9; became a tax paying wage slave at 13; before that he was just a slave, and has never drawn unemployment or disability of any kind until at age 64, when govt finally awarded him 10% disability for an injury denied over 40 years ago, which was the least threatening of his injuries. He did all the "right" things American society and culture demanded of him in return for the right to live in them. HE ACCOMPLISHED ALL THIS AND MUCH MORE FOR AMERICA WITHOUT ANY HELP FROM IT WHILE SUPPORTING THE PARASITIC COUNTRY AND ITS GOVT

**PARASITICALLY DRAINING HIM 55 YEARS, AND IS STILL PAYING FOR IT, AND WILL DO SO UNTIL DEATH DO US PART! HE IS THE PERFECT SLAVE TO SOCIALISM BECAUSE THE COUNTRY CONDITIONED HIM TO BE SO FROM WOMB TO TOMB.**

However, cruel destiny forced him while literally dying back under Socialist care, which landed him in Dallas Regional Socialist hospital by way of a local private medical care civilian hospital, which first had to stabilize his condition enough to survive live transport, which was his first visit to socialist regional medical care in over 40 years. The socialist related diseases were taking a deadly toll. After over four decades, he finally received 10% rating and a monthly stipend of 140.00 dollars for a disability denied in 1980. He used that with additional personal, private monies to purchase private health insurance, costing over 15 thousand dollars in premiums a year and rising. He also pays *socialist healthcare taxes for a useless product of no use to him and also pays for other nonproductive Americans healthcare benefits he can neither afford nor qualify to receive*. Socialist care gets even more expensive when using his private insurance in paying for socialist healthcare plus losing 6 of his best years of life drafted into doing serving the police state and over 55 years of paying US income and other socialist taxes that fund government and institutions suchlike Socialist healthcare white elephant and dark horse. He will continue paying for through US taxes and service related illnesses for the remainder of his life.

Another Vet collecting 100% disability from socialist govt dole plus thousands of tax-free dollars and other benefits each month, and who is expert at playing the disability game using *different* rules taught to him by different teachers, called Pt1 a fool for paying for socialist healthcare with his health insurance and taxes. He is required by law to do so which is why Pt1 does so. Perhaps the man is correct. Pt1 did what was right by guidelines taught to him; but it seems **no good deed goes unpunished when dealing with socialist government**. Pt1 in fighting a losing battle to recover from serious deadly illness is tired, spent and really would rather just throw the fight, TKO and check out of this hellhole. For some reason fate forbids that until he completes unfinished business in this hell. Therefore, Pt1 struggles to recover, copes while paying Socialist dues while killing time until it finally kills him. The government socialists mistreat him punitively s as though he is robbing it in seeking earned help that it promised and agreed to do as written in the employment contract that forced him into bonded servitude to the socialist police state. socialist healthcare mistreated him abusively, cruelly & mostly as a cash cow providing to the firm a maximum return of investment in exchange for minimum outlay: his reward – ‘it thanks him in party slogans.’ Party smile ☺

**Pt2**, is 51 and gets 3000.00 dollars cash per month @ 100% disability rating and far more from socialist state Administration. He got this award over 25 years ago shortly after job termination in his late 20's. He, too, plays the game by *different* rules. An emotionally immature man, he is physically healthy and hale, lives with a girl friend in a classic dependent, co-dependent relationship, and drinks away his monthly disability check. When it runs out, Pt2 arranges to get admitted into Socialist Regional hospital for the equivalent of taxpayer government sponsored Betty Ford rehab until his next socialist government check arrives. Then he manages a release to go on another drinking binge until it runs out, and ditto. He is a regular; staff nurses know him by first name and vice versa. Constant streams of hospital medical personnel lecture him on his alcoholism. He is affable, promises to do better, etc. When they propose AA and rehab, he promises to try harder, has heard about them, and other well rehearsed excuses. He is very good at melodrama, and is well versed in stall and red herring diversion to deflect all attempts at getting him into an earnest recovery program and off the public dole paying for his addictions. Pt2's sob stories include: his girlfriend beat him up, life let him down, his girlfriend and parents are mean to him, this reason or that reason, bad luck, car problems, my family hates me, poor little me, ad nauseam. During his stay, hospital staff pampers him like a little prince; nurses shower him with attention, extra care, snacks, ad infinitum. **The Socialist state enables and totally supports and rewards his chronic alcoholic dependency, self-destruction and has done so for decades.** These are his historical accounts to and observations by Pt1: in other words this is his story in his words. Socialist medicine enables him to use resources that could be better spent on very sick Patients waiting for hospital beds chronically in short supply. Everything under socialist lootership remains chronically in short supply to control the dumb-mass slaves so they keep feeding socialist parasites all their lives chasing the ever elusive dangling carrot never to get close enough for even a sniff or bite before dropping dead broke. Socialist gods and goddesses say, 'that is good.' now we don't have to pay on our promises not that we ever intended to do so anyway. We own slaves

and can do as we please with them say socialist gods and goddesses. Pt2 in tending a few painful hangovers at home might just be the best thing for him as incentive to sobriety. His mean girlfriend and parents might just be trying to help him through tough love to grow up into a man and responsible adult pulling his weight earning his right to live in American society. Pt1 needs the help but is punished for making gains, pulling his weight, while still paying his dues to society in return for socialist party slogans such as 'thank you for your service.' Government handsomely rewards Vet2 for doing the opposite in becoming a mini-me parasite like it.

**What is skewed about the aforewritten Socialistic medical healthcare scenario? Socialism rewards people who do not pull their weight, and punishes those of us who do. Socialism robs producers and after self-rewarding then 'equally' distributes remainder to their mobs. Socialists since you persist in being a parasite stop killing off we hosts!! Kill and eat each other all you want!**

**AMERICA DOES NOT NEED ANY MORE SOCIALIST PARASITES WE NEED MORE REAL MEN AND WOMEN PRODUCTIVE & PROACTIVE ADULT HEROES.**

**SOCIALISM REWARDS UNPRODUCTIVE PARASITES AND DESTROYS SOCIETY'S PRODUCERS.**

**100 US vets suicide daily because of socialist VA abandonment & abuse.**
